#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 4-7 and 9-12 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Fortin (5457898).

Fortin shows a shoe comprising a sole (12), a toe cap (15), an upper (14), and a metatarsal guard (11) with a convex arch/instep portion (shown in figure 1), and a single right and complementary left leg (side portion which lead to the edge 13) which are in contact with the sole as claimed. In reference to the limitations of “only a single”, Fortin clearly shows a “single leg”, the rear portion of the sides shown in the figures, the front elements could be considered to be a “brace” or forward support. In reference to the limitation of “said convex arch portion having a section immediately rearward of the support legs which does not bear against the sole, Fortin clearly shows such at the location of the arrow from number 10 in figure 2. In reference to a “lip”, elements 16 are considered to be a lip which overlap the toe cap but which do not contact/bear on the sole as claimed.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3728

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 4-7 and 9-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fortin.

If applicant argues that the guard of Fortin contains "spaces" and multiple legs, it has been held that omission of an element and its function in combination where the remaining elements perform the same functions as before involves only routine skill in the art. In re Karlson, 135 USPQ 184. It would have been obvious to remove the flexibility elements/cuts (19 and 20) from the guard of Fortin to provide a stronger, stiffer, less expensive guard and shoe. Also, it would have been obvious to remove the front element (shown forward of the slit) and its function to provide a lighter weight guard which still provide protection.

#### ***Allowable Subject Matter***

1. Claims 8 and 13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### ***Response to Arguments***

1. Applicant's arguments filed 2/3/05 have been fully considered but they are not persuasive.

Art Unit: 3728

In response to applicants' argument that Fortin does not show "that only the right support leg and left support leg of the metatarsal guard are in contact with the sole", the claims do not require such. The claims states that the legs are in contact with the sole, but the claims do not negate additional elements contacting the sole as suggested by applicants arguments. Also, even if the claims would require such the 103 rejection would still be pertinent, the guard of Fortin if modified by omitting the elements/cuts/slits or by omitting the front portion in front of the slit, this modification would result in the only portion of the guard which would be contacting the sole being the leg portions.
